Introduction

Problem Description

Motivation

Data Source

Reproduction

Reproduction Code

```
teams <- read_csv(here('teams.csv'))

## Parsed with column specification:
## cols(
##   yearID = col_double(),
##   teamID = col_character(),
##   G = col_double(),
##   W = col_double(),
##   L = col_double()
## )

salaries <- read_csv(here('salaries.csv'))

## Parsed with column specification:
## cols(
```

```
##   yearID = col_double(),  
##   teamID = col_character(),  
##   playerID = col_character(),  
##   salary = col_double()  
## )
```
